# “LAUNCH AND ENHANCE YOUR BUSINESS WORKSHOP”

There is no better way to get the ball rolling on your dream of opening your own business than to enroll in the Renaissance Entrepreneurship Center's Business Planning course. Opening your own business can be as mysterious and daunting as racing the Indy 500 or rocketing to the moon ...luckily the "Ren" center acts as your "Pit Crew" and your "Ground Control." I benefited greatly from the camaraderie and support of my classroom peers as well as the very thorough, very in-depth, and real-world coursework. Most of all, at the end of the course, you have the understanding and the tools to either launch your business right away, spend more time acquiring the necessary skills, or start the process anew with a different, more appropriate business idea. Either way, you have done your due diligence and you're ready for lift-off!
